

WHAT IS

# HIGH BRIX CANNABIS?

**Brix is the measure of sugar (sucrose) in plant sap.**

It's a numerical expression that can be an indicator of plant health. Generally, the higher the brix level, the healthier the plant. The healthier the plant, the cleaner and clearer the high.

To achieve these high brix levels, our plants are grown in balanced and mineralized soil producing the highest quality of flower.

**Soil Health is the ROOT of our Mission!**
